

# Safety and health in the workplace online training course

Welcome to an online course where you take control of your role in occupational safety and health (OSH). On the course, you will enhance your expertise and think about the health and safety practices at your workplace in a concrete way, either on your own or with your team.

## Who is the training intended for?

The training is intended for all OSH operators: OSH managers, OSH representatives and their deputies, members of an OSH committee, OSH ombudsmen and other individuals appointed to specific OSH duties.

To make the most out of the training, we recommend teams to complete it together.

## Training contents

- Roles and responsibilities: the roles of various operators, key legislation
- Joint activities: the cooperation principle in OSH, a shared workplace and main cooperation parties
- Practical tools: basic risk assessment, accident investigation and safety observations, safety communication
- Your role: acting as an OSH operator, the Vision Zero of safety, skill development

## Benefits of the training

- Ensuring basic skills: the expertise of various operators is enhanced
- A common foundation and language: a common foundation effectively promotes OSH cooperation at a workplace
- A common goal: improving OSH is a shared goal and training completed together will fortify this view
- Practices that function well at the workplace, as well as OSH elements that require improvement, will be gathered together during training.
